RE: Endorsement of the statement of ESSIC

To Whom it May Concern,

We Archipels SAS, formerly endorse the statement and the project of ESSIC - the European Self-Sovereign Identity Consortium. We align with the given concept and principles of ESSIC and endorse their intention to help establish a trustworthy digital identity infrastructure via a “network-of-networks” approach, to facilitate international adoption and to provide a better governance framework.

Archipels is a startup founded on the basis of a consortium by four major French companies in public investment and services, banking and energy. Archipels builds blockchain infrastructure for digital trust services, document certification and trusted digital identity. It develops and provides digital trust services for people and organizations to certify or verify digital documents and identity. Archipels believes that the future of digital identity is decentralized. It aims to become a European platform of self-sovereign digital identity in order to increase digital trust and fraud prevention. Archipels is an active member of the INATBA’s Identity Working Group and Privacy Working Group. Find out more information about Archipels at www.en.archipels.io.

Sincerely yours,

Hervé Bonazzi (CEO)
